What is Formik?

Description

Formik is a small group of React components and hooks for building forms in React and React Native. It helps with the three most annoying parts: Getting values in and out of form state. Validation and error messages. Handling form submission.

What is MUI?

09.06.2023, 17:28:35

MUI, or Material UI, is a massive library of UI design components that developers can easily import to build React applications. It is an open-source project that follows Google's guidelines for creating an app or website components.
